GOSHEN, N.Y. - Blaser Swissslube, Inc., premier supplier of world class, Swiss-quality metalworking fluids, is now offering a newly-redesigned Jetmix, featuring an improved concentration control knob and built-in backflow preventer.

The improved, heavy-duty Jetmix also has a repositioned built-in manometer to allow for clearer pressure readings than ever before.

The new, sleek look of the Jetmix allows for easier adjustability with a variety of mounting positions for walls, drums and totes. This new Jetmix is also now available in the signature "Blaser" blue, signifying the reliability and dependability always associated with all Blaser products.

Founded in 1936, Blaser Swissslube, Inc. has formulated first-rate metalworking solutions for 70 years. Blaser metalworking fluids are recognized world wide for dependability in improving productivity tool life, production and part quality and reducing overall production costs. Blaser products are developed by a team of researchers at the Blaser headquarters in Switzerland, and U.S. production is based in Goshen, N.Y.
